**(a) the referent is a link, not a string**

**kept**

`ACCT-4cd0` owner known

**delete**

`[REDACTED]` owner lost

**alias**

`[ACCT-A]` owner known

*the answer text is the same in all three rows*

**(b) where the boundary is**

*operator*

raw log -> routing rule

keyed alias map (stays here)

**prompt only**

**model provider**

reads the prompt,

may retain it

*who can do what*

provider: aliases only

key holder: everything

**(c) the plane we argue in**
