(a) the referent is a link, not a string

kept

`ACCT-4cd0` owner known

delete

`[REDACTED]` owner lost

alias

`[ACCT-A]` owner known

the answer text is the same in all three rows

(b) where the boundary is

operator

raw log -> routing rule

keyed alias map (stays here)

prompt only

model provider

reads the prompt,

may retain it

who can do what

provider: aliases only

key holder: everything

(c) the plane we argue in
